**DETAILED ACTION**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21, drawn to a pharmaceutical composition containing a plant extract, classified in class 424, subclass 725, for example.
- II. Claims 22-26, drawn to a method of preparing a pharmaceutical composition, classified in class 424, subclass 725, for example.

Invention I and invention II are related as a product made and process of making. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case there are other extraction processes such as water extraction.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
